Smokefree Dining in Henderson County

*A Guide to Smokefree
Restaurants*

August 2008

SECONDHAND SMOKE

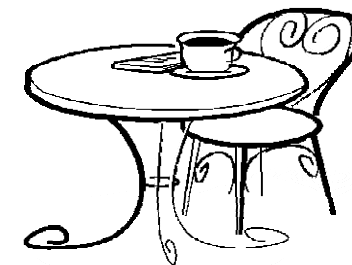

Secondhand smoke, also known as environmental tobacco smoke (ETS), is the 3rd leading cause of preventable death in the United States, causing approximately 3,400 lung cancer deaths and 46,000 heart disease deaths in adult *nonsmokers* each year.

Secondhand smoke has been designated as a *known human carcinogen* (cancer-causing agent). It contains over 4,000 chemicals, 50 of which are known to cause cancer. Breathing this environmental tobacco smoke can have immediate adverse health effects, and is especially dangerous to children. Evidence shows that there is no risk-free level of exposure to secondhand smoke.

This list of smokefree restaurants has been provided to help reduce your exposure to secondhand smoke. It is our hope that as awareness of the dangers of ETS increases, the current list of smokefree restaurants will continue to grow.

Henderson County Department of Public Health would like to commend these smokefree restaurants for helping to provide a healthy environment to its patrons and employees.

Please express *your* thanks to the restaurant managers during your next visit.
